IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring requirements Not Met For:

CITY OF EMORY

Our system collected every required coliform sample, however, we failed to label the samples correctly. We labeled them "special" when we should have labeled them "routine". Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During August 2026 we completed our monitoring but failed to label the samples correctly for coliform bacteria and therefore cannot be sure of the quality of your drinking water during that time.

What should I do?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, we are required to notify you within 24 hours.

What is being done?

We collected every required coliform sample in August of 2026 and are no longer in violation.

For more information, please contact Cody Brimer at 903-473-6426.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
